CONTINUING PROFESSIONAL DEVELOPMENT CIVIL ENGINEERING SEMINARS

Seminar 1 – The Changing Face of Drainage

With some of the greatest changes to drainage law since the Victorian times, this seminar explores the implications facing developments with regard to surface water drainage both now and in the future.

Key topics:

- Flood & Water Management Act 2010
- Environment Agency, Anglian Water and Local Authority objectives
- SUDS
- Flood Risk
- The Code for Sustainable Homes
- Surface Water Hierarchy

Seminar 2 – When to Consider Infrastructure?

During our experience of projects we have come across many examples of the pitfalls of infrastructure design. Using projects we have worked on, this seminar highlights lessons learnt in the design process.

Key Topics:

- Cost Management
- Programme Implications
- Planning Permission
- Early Consideration
- Other Consents

Seminar 3 – A Consultant Engineers View on the Construction Process

We recognise that our view of life and the construction process can be very different to the rest of the development team. This seminar provides an insight into how we approach projects.

Key Topics:

- The Engineers Character
- Engineering Aims
- Planning Process
- Tender Process
- Construction Phase
